# About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

## Disclaimers

### Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

### Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

## SENIOR LEADERSHIP STATEMENT

### SENIOR LEADERSHIP STATEMENT

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

#### Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

In line with its values and principles, Luzerner Kantonalbank also fulfils its responsibilities as an investment manager and investment advisor. LUKB is convinced that farsighted thinking and the integration of sustainability criteria are prerequisites for successful investment decisions and fiduciary asset management. The focus is on the major challenges facing our society, in particular achieving the Paris climate goals and supporting a more sustainable society in line with the United Nations Sustainable Development Goals. Luzerner Kantonalbank's goal is to integrate ESG factors into all advisory and investment solutions across all relevant asset classes and to systematically address sustainability in every client interaction.

#### Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
  - refinement of ESG analysis and incorporation
  - stewardship activities with investees and/or with policymakers
  - collaborative engagements
  - attainment of responsible investment certifications and/or awards

A major project to implement the ESG strategy in asset management was completed during the year . Since autumn 2022, financial analysis, investment advice and asset management have been systematically aligned with sustainability criteria (ESG criteria). This also applies to the management of the LUKB Expert funds, which now have a volume of CHF 4.6 billion. Active ownership measures complete the framework of a comprehensive ESG strategy.

The basis for this is the sustainability assessment of investment instruments. For this purpose, LUKB has developed its own definition based on ESG data points from various well-known data providers.

In the case of equities and bonds, for example, in addition to ESG ratings, the assessment of business conduct (controversies), exclusion criteria, risks and opportunities related to climate change and the contribution to a more sustainable society are also important. LUKB's investment advisory solutions allow clients to choose between three different sustainability preferences. This preference is systematically recorded in the investor profile. Transparency is important for understanding: We provide comprehensive ESG information on the instruments in the investment universe and also show at portfolio level how we assess investment decisions from a sustainability perspective. Client reporting includes an ESG analysis as standard and shows the temperature alignment of the portfolio in relation to the Paris Agreement.

LUKB's dialogue strategy focuses on compliance with global standards, for example in the case of serious human rights violations and in the areas of climate change and biodiversity.

### Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Over the next two years, we will focus on the implementation of our comprehensive ESG strategy, in particular the training of our client advisors and the continuous improvement of our processes and systems.

Our coordination activities will be significantly expanded, both quantitatively and qualitatively, as a rigorous continuation of the active ownership strategy launched at the end of 2022, with support from external service providers for both proxy voting recommendations and voting. Our proxy voting policy will include a strong focus on climate change in addition to ESG factors.

How does your organisation, or the external service providers or external managers acting on your behalf, prioritise the investees or other entities on which to focus its stewardship efforts?

Adherence to global standards:

Compliance with global standards is of central importance to us. LUKB participates in a norms-based engagement pool and seeks dialogue with companies in the event of human rights, labour, environmental or corruption violations.

LUKB activities in 2022: dialogue in the norms-based engagement pool of ISS ESG, support for initiatives of the FAIRR investor network.

Reducing biodiversity loss:

Biodiversity loss is considered one of the greatest global risks.

We want to encourage companies to improve their transparency on biodiversity risks, their impact on nature and their nature-related risk management strategy.

LUKB activities in 2022: dialogue in the ISS-ESG biodiversity engagement pool, support for FAIRR investor network initiatives.

Climate-friendly orientation:

The effects of climate change are one of society's greatest challenges. We are committed to making companies more climate-friendly.

LUKB activities in 2022: Participation in the "Climate Action 100+" initiative, dialogue in the ISS-ESG "Net Zero" commitment pool.

### Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Sustainability rating and exclusions

In addition to other criteria such as ESG rating or exclusion criteria, the assessment of climate change risks and opportunities is an important component of the sustainability rating. In the area of fossil energy, exclusion criteria apply to coal mining, coal-fired power generation and unconventional mining practices (such as oil sands). Countries that have not ratified the Paris Climate Agreement are excluded.

(B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products
